CAS INDEXING IS AVAILABLE FOR THIS PATENT.
AB A preparation method for biochips. The method comprises spraying a hydrophobic material onto a substrate by a micro injecting process to form a hydrophobic region thereon, wherein the hydrophobic region separates a plurality of partitions on the substrate, and immobilizing a probe on the partition by the micro injecting process.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB The present invention provides a **4D biochip** containing m
3D biochips having n capillaries, wherein the n capillaries each contain a
biol. factor, and methods for preparing and using the **4D**
biochip to provide rapid, efficient assays of large quantities of
samples and/or factors.
